VESPAMANIA!

by Mick himself (including a dry build) using parts mainly sourced from Kev at K&S Scooters (<http://kandscooters.co.uk>). However, he decided to entrust the final paintwork to Craig who runs the Scooter Paint Shop (<http://topscooterpaintwork.co.uk>). This was finished off with pinstriping, courtesy of Jon of LetterKnight (www.letterknight.co.uk). He'd like to send out his thanks to all those mentioned – including Ian Wilkins who supplied him with the original frame.

Having got back into scooters only five years ago, Mick has had a smile on his face ever since. He goes out with his mates from the 'Last of the Summer Wine SC' every Friday night and enjoys riding with them to the IoW Rally. His other hobby is working on old Triumph cars and on that score, we'll let him have the last word; when I asked him why, his reply came back: "Anything to avoid working on Lammies..." (lol).

Words and Photos: Mau

Footnote: On the day of the photoshoot, there was a blizzard with snowflakes coming down the size of ha'pennies – if you can remember what one of those was... consequently these pictures were taken in Mick's garage and outside between snow flurries.
